Food Policy And The Environmental

The changing economic environment for the consumer that is emerging from the wreckage of the financial credit crunch plays directly into the importance of food spending. This is certainly true from the perspective of food prices in the short run, but also from the perspective of sustainability and reducing the impact of the environmental credit crunch. The economic changes we experience now ...

in disadvantaged populations. We aim to improve the health of children and families through comprehensive policy and environmental approaches.

ASU Food Policy and Environment Research Group

It is impossible to separate our food production, processing and distribution from our environment. Unfortunately, the industrial or “conventional” way of producing food causes large-scale environmental degradation. Monocropped fields require chemical fertilizers and pesticides that run off into soil and waterways.

How Food and the Environment are Connected | FoodPrint
