ISPF is a full-screen editor and dialogue manager. Interactive System Productivity Facility (ISPF) is a software product for the z/OS operating system that runs on IBM mainframes. It includes a screen editor, the user interface of which was emulated by some microcomputer editors sold commercially starting in the late 1980s, including SPFPFC.

The dialog uses the ISPF editor when you select a job through the S or B line commands. ISPF Edit is called with CAPS set to OFF. This setting preserves your text input in the form in which you enter it (uppercase, lowercase, or mixed case). If you enter mixed case input in a job, the dialog does not convert your input to uppercase characters.

ISPF is a full panel application navigated by keyboard. ISPF includes a text editor and browser, and functions for locating and listing files and performing other utility functions. After logging on to TSO, users typically access the ISPF menu. In fact, many use ISPF exclusively for performing work on z/OS®. ISPF menus list the functions that are most frequently needed by online users.
